

Box 11 File 14

ANOTHER MERCY FLIGHT was made Sunday by Dr. Dan Dorchester when 80-year-old Henry Oleson was taken from Washington Island to Memorial hospital for an emergency operation. From the time Dr. E. C. Farmer of the Island called until the patient was in the hospital only an hour and 15 minutes was

spent. Dr. Dorchester said Tuesday that Mr. Oleson's illness might have been fatal if time had not been pared by flying. He said the patient is now "doing fine."

Shown from left are Dr. Farmer, Mr. Oleson, Cecil Anderson and Dr. Dorchester.
